

Welcome to the Public Hearing for the J-2 Regulating Reservoirs Project (Project). The Project is being developed by The Central Nebraska Public Power and Irrigation District (Central). This sheet provides an overview of information available at four stations:

- Property Acquisition
- Engineering
- Federal Permitting
- Project Needs and Benefits

In addition to the information presented at the stations, this hearing provides the opportunity for you to comment on, or state objections to the Project. If you wish to comment or state an objection, please visit the comment and objection station.

INFORMATION STATIONS

Property Acquisition

The Property Acquisition station provides information related to the land that needs to be acquired for this Project, the rights of each property owner, and the process Central is following to acquire the land.

Engineering

The engineering station provides information regarding the primary project components, a general schedule for the Project, and reasons for selecting the Project site.

Federal Permitting

The Federal Energy Regulatory Commission (FERC) is the lead agency responsible for permitting the Project. The Federal Permitting station presents information about the three-stage process for permitting, how to submit formal comments to FERC, and information related to environmental and social resources to be considered during the permitting of the Project.

Project Needs and Benefits

The Project Needs and Benefits station explains the nature, necessity, and anticipated benefits of the Project.
